Missing Your Human Information?

Integrate Your Human Information to Avoid Serious Upsets
Now I can issue instructions, and see that they are followed precisely. The worksheets collect and filter the important stuff from the units into a single sheet that I can also see on my mobile device.

Now I am connected to the rest of the team via my mobile and I no longer have to get back to the control room to find out what is going on.

We've now got complete control of all our inspections. Data entered into the industrial mobile device is synchronized automatically with the enterprise system and Wonderware System Platform.
Making informed strategic decisions requires validated, data from a huge number of sources presented in a way that we can easily understand.

We can also easily distribute our instructions and make sure they are carried out correctly.

I get to make informed decisions because all the information I need to keep everything working is all collected for me. Work requests from the field, Work Order info from SAP PM or IBM Maximo and Permit Information as it happens.

We now get reliable, validated site information which is key for us to maintain compliance and ensure the safety of our workers and the general public.

Wonderware Historian process tag values and history are available within j5 to facilitate the triggering of automated logbook entries and for incorporation of rich historical data into the j5 Shift Handover.

THE ONLY OPERATIONS MANAGEMENT PLATFORM WITH SPREADSHEET CONFIGURABILITY AND ENTERPRISE SCALABILITY

Infineum (Global Implementation)

I've had the pleasure of working closely with the j5 team over the past two years. The team’s commitment, dedication and professionalism have impressed me immensely. It was a pleasure to see our customer’s satisfaction with the joint j5 International – Schneider Electric solution. I would have no hesitation in recommending j5 to any future potential customers.

Calpine (USA)

It has become an essential tool. Logbook entries from twelve remote sites can now be easily reviewed first thing each morning. It makes the employees more accountable for their actions and is just a good way to communicate.

j5 Operations Management is the ONLY system with spreadsheet configurability and enterprise scalability.
