Information Management
and Technology Unit
INPEX

On every industrial site, there is a **stream** of operations, maintenance and safety events occurring at all levels and areas within the process.

Unfortunately, there are still **inadequate**, time consuming methods such as paper, word processor, spreadsheet and homegrown applications being used to log these events. This increases organisational risk and **inefficiencies**.

Crucial daily information such as Shift Handover reports can be **error prone** and take time to aggregate. This information is also poorly categorized, time-consuming to retrieve and not widely accessible.

Poor traditional methods of data logging are **not integrated** with other software, such as Data Historians and CMMS systems, resulting in dual capture and information silos.

How j5 Provided the Solution

To remedy these pains, companies across the world utilize the **j5 Operations Logbook**. Allowing their operations teams to record, manage and view any event in a consistent and efficient way with a web browser and mobile device. j5 Operations Logbook users have reported the following **benefits**:

- Easy to Use
- Consistent Logs
- Simple Customization
- Wide Visibility of Operations Data
- Eliminates Paper, Spreadsheets and Scattered Databases
- Saves Time and Improves Accuracy
- Advanced Workflow Capabilities
- Fast Search and Filtering Data
- Integration With Other Systems
- Real-time Events Monitoring

j5 is a powerful Operations Management Platform that empowers people to manage and adapt evolving industrial processes.

Safety

We now get reliable, validated site information which is key for us to maintain compliance and ensure the safety of our workers and the general public.

Supervisors

Now I can issue instructions, and see that they are followed precisely. The worksheets collect and filter the important stuff from the units into a single sheet that I can also see on my mobile device.

Production

We now know exactly how well operations have responded to our targets, and if not why not. With the real-time information AND operations logs, we are fully informed to define the next day's operations.

Control Room

We now have rich real-time info in our Shift Handovers, in our target management, in procedures like start ups, in permits etc. Not having this data would seriously impact our efficiency, production and safety.

Engineering and IT

Using a single, intuitive spreadsheet-like tool, we can control every aspect (content, calculations, workflow, communications, presentation etc.) in every worksheet across the organization.

Management

Making informed strategic decisions requires validated data from a huge number of sources presented in a way that we can easily understand. We can also easily distribute our instructions and make sure they are carried out correctly.

Field Operators

I am now connected to the rest of the team via my mobile and I no longer have to get back to the control room to find out what is going on.

THE ONLY OPERATIONS
MANAGEMENT PLATFORM WITH
SPREADSHEET CONFIGURABILITY
AND ENTERPRISE SCALABILITY
