Are Your **Operations** and **Maintenance** Teams Geared for Success?

Synchronise the SAP Plant Maintenance (PM) Asset Register, Work Orders and Work Notifications With j5 Operations Management Software
Control Room
We can view and create Work Orders and Work Notifications when operations equipment and areas require maintenance. This can be done using our familiar j5 Operations Management Software.

Field Operators
We can view and create Work Orders and Work Notifications in the field, which is particularly useful when we notice maintenance issue whilst undertaking j5 Inspection Rounds on our mobile devices.

Maintenance
I get to make informed decisions because all the information I need to keep everything working is all collected for me. Work Orders and Work Notifications from my SAP PM CMMS appear in the same Functional Locations and Equipment categories in j5 Operations Management Software, making it easy for me to use both.

Safety
We now get consistent information and in sync processes from the operations and maintenance departments, which is key for us to maintain compliance and ensure the safety of our workers and the general public.

SAP Plant Maintenance
- Functional Locations
- Equipment
- Work Orders
- Work Notifications

j5 Operations Management Software
- Operational Areas
- Asset Register
- Work Orders
- Work Notifications

THE ONLY OPERATIONS MANAGEMENT PLATFORM WITH SPREADSHEET CONFIGURABILITY AND ENTERPRISE SCALABILITY
